Again, however often we are told this – as we are by the BBC and others every time there is a disastrous heatwave, flood or cyclone somewhere in the world – even the IPCC itself had to concede this in its latest report that there is no hard evidence that any of these things are becoming more frequent or intense than they were previously. Both historical and economic Thomas Gale Moore is a senior fellow at the Hoover Institution who specializes in international trade, deregulation, and privatization.

It never dies; it merely fades away to the surface later. About Thomas Gale Moore. Here are 10 of the claims made by those gathered in Paris with commentary on just how far their fears are really justified. In this case, that would mean simply informing your friends and family about all the things you are already doing to help reduce climate change.

This book is not yet featured on Listopia. In short, emphasizing agreement that levels of CO2 were parts per million p.
