Richard Burton has carried a film or two in his day, and he tries to tote this one. And so we need to figure out what the length of segment AC is.

We hopefully feel good about the fact that AB is going to be congruent to AC. Jacques, Ruby Dee, Frank Silvera. Uncredited, as a patron at the theater.

So this right here is the point A. If you make the string twice as tight, or keep it the same, we get $x^2 - 12x + 24 + y^2 = 0$. Men at the Cinema Robin Gammell
