He did it on purpose! Small amounts of human milk about an ounce can be discarded.

If there is an emergency during nap time other adults should be on the same floor. Toys, equipment, and surfaces used by the ill child should be cleaned and disinfected after the child leaves. Warming Bottles and Infant Foods. Seven thousand children per year require emergency department visits for problems related to cough and cold medication 7.

Cleaning and disinfecting the surface without damaging it requires use of sp... the absence of data to support the effectiveness of shorter periods of flushing it seems prudent to use the same fifteen to twenty minute standard following exposure to bloodborne pathogens 5. Although the cause of many sudden infant deaths may not be known, researchers believe that some infants develop in a manner that makes it challenging for them to be aroused or to breathe when they experience a life-threatening challenge during sleep.
