Using inadequate local maps, with few functional field telephones, faulty reconnaissance and reliance on runners for communications, the battlefield environment wasn't much different from Shiloh or Chancellorsville – except for the deadly additions of machine guns, toxic gas and high explosive artillery. Even rudimentary maps to aid the reader would have been beneficial.

The best book I have read on the development of the tactics and strategies of the modern Marine Corps. Axelrod has done it justice with a book that holds the reader's attention, reads very quickly, and yet covers all of the necessary details. Nearly every plan that they tried to execute in one way or another failed. Prairies report on the horrible toll at Belleau Wood. The best book I have read on the development of the tactics and strategies of the modern Marine Corps.
