Students discuss the characteristics of storms, including the relationship of weather fronts and storms. On Earth, we would likely experience such a storm as heavy rain, thunder and lightning. Often, these storms are what we classify as severe storms. However, if the updraft continues, this cloud mass will continue to grow and rise 40, feet 12, m or more up into Stormy Skies troposphere. Engineers not only design weather forecasting instruments and software to predict a future storm, but they help protect Stormy Skies during a storm. We can use a balloon and a scale to demonstrate this concept. Dramatic rain cloud background.
