(ed): Head and Neck Oncology. Hansen HH (ed): Lung Cancer:  
Basic and Clinical Aspects.

The research on head and neck cancer has generally lacked a  
primary care perspective. Statistics Treatment is based on the  
clinical stage and location of the tumour and follows  
suggested guidelines. Options .. Basic and clinical aspects.

Disease preventive measures include smoking cessation,  
limiting alcohol intake, preventing exposure to tobacco smoke  
and environmental carcinogenic agents, early detection of  
infection by HPV, maintaining oral health, good eating habits,  
and managing stress. Studies have included either subgroup or  
correlative analyses of such characteristics with outcome 35,  
Despite the rarity of patients with head and neck carcinoma in  
primary care, patients with symptoms of these diseases and  
especially with symptoms of tongue and glottic carcinomas  
should be initially referred for further care or followed up.
