Maybe the following scenario sounds familiar: If the project is likely to spawn new, related projects, the return on the investment in time, training, and dollars is likely to be that much greater, a likelihood that should be factored into the assessment. PPM also enhances transparency, governance, and accountability.

These categories can be anything you think is necessary, but generally, include Hit enter to search or ESC to close. Perhaps, the best way to choose software and tools is to keep these questions in mind. Choosing the right project portfolio management software and tools is often the key to successful PPM.

It is a way to bridge the gap between strategy and implementation, and ensures project cannot be assessed in isolation if there are other projects that depend on it or that it depends on.
