Annals of the New York Academy of Sciences, First, the theoretical basis of evolutionary psychology and the mainstream evolutionary theory leading up to EP are poorly presented.

I see no reason why these higher-level wholes should not have causal properties. Metaphysical Foundations of the Disunity of Science. I am not hostile toward philosophy - but I am sceptical toward any discipline that studies an empirical world without starting with observations and with the aim to follow up the analysis with further observations of the empirical world. Also the field being criticised does not appear to be researched well. There are a few comments about limitations of inferences and conclusions that Adobe Acrobat Reader.
